CONCEPT

DESIGN

BUILD

HIGH PURITY SOLUTIONS

We design, build and install all high purity water purification systems and piping in-house using our own licensed plumbers and trained staff.

Whether we build the entire system on site or install a pre-fabricated system, every aspect will be up to plumbing and electrical code with professional craftsmanship.

We work with your on-site engineers to develop a high purity system, custom designed and built to fit your unique building's space requirements and water quality specifications.

ABOUT ATLAS HIGH PURITY SOLUTIONS

Atlas High Purity Solutions (Atlas HPS) designs, builds, and maintains water purification systems for high purity and special applications use, employing state-of-the-art water technology and turn-key solutions. We understand the critical importance of maintaining a consistent and known level of purity for process water in hospitals, pharmaceutical labs, bio-tech manufacturing and testing – anywhere a ready supply of pure water is essential.

For more information on our Atlas High Purity Solutions & Special Application water systems or to schedule a no-obligation site evaluation and system recommendation, please call (781) 373-4700, option 2, or email sales@atlashighpurity.com.
