

SANITARY STAINLESS STEEL ORBITAL WELDING

Using state-of-the-art equipment and certified technicians, Atlas High Purity Solutions specializes in sanitary piping systems and orbital welding for water-for-injection (WFI), clean steam, and ultra filtration applications. Our work meets guidelines for "3A Sanitary Standards" and meets ASME Section IX and ASME B31.3 codes, as required by food processing, pharmaceutical, and biotechnology industry standards.

- Equipment is state-of-the-art gas tungsten arc welder
- Touch screen provides reliable, consistent, precise welds every time
- From high purity environments to construction to plant utilities, meeting SME-BPE 2002 welding standards
- Equipment range ½" up to 4"

ABOUT ATLAS HIGH PURITY SOLUTIONS

Atlas High Purity Solutions (Atlas HPS) designs, builds, and maintains water purification systems for high purity and special applications use, employing state-of-the-art water technology and turn-key solutions. We understand the critical importance of maintaining a consistent and known level of purity for process water in hospitals, pharmaceutical labs, bio-tech manufacturing and testing – anywhere a ready supply of pure water is essential.
